Executive Summary

Develop practical and user-focused software solutions using Python, JavaScript, and modern web technologies, with hands-on experience in AI-powered applications, machine learning, REST APIs, and web development. Skilled in problem-solving, application development, and learning new technologies, with a strong interest in building efficient solutions for real-world problems. Seeking an entry-level opportunity to contribute technical skills, grow professionally, and deliver impactful software solutions.

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3
Frameworks/Libraries: Flask, REST APIs
Tools & Platforms: Git, GitHub, Visual Studio Code, Vercel, Firebase, MS Excel, MS Word, PowerPoint
Soft Skills: Team collaboration, Problem-solving, Communication, Leadership

Projects

AI-Powered Plant Disease Detection & Treatment Recommendation System | *Live Demo* **Feb 2026**

- Built an end-to-end web app where users upload a leaf photo and receive a disease diagnosis within seconds.
- Used a CNN (MobileNetV2) to extract visual features, then passed them into an SVM classifier to identify the disease across multiple classes.
- Wrote a Flask REST API to handle image uploads, run inference, and return structured JSON responses with confidence and severity scoring.
- Added organic/chemical treatment recommendations and tested edge cases like low-confidence and out-of-distribution leaf images.

Online Course Reservation System | *HTML, CSS, JavaScript* | *Live Demo* **June 2025**

- Developed a responsive course reservation web application with dynamic course cards, instructor details, course levels, and real-time seat availability.
- Implemented JavaScript-based course search and filtering functionality using DOM manipulation for faster course discovery.
- Built an interactive reservation workflow with form validation, modal-based booking, seat availability checks, and automatic slot updates after successful reservations.
- Designed a responsive dark-themed UI with course cards, hover effects, booking modals, and toast notifications using HTML5 and CSS3.

Grocery Website | *Live Demo* **July 2025**

- Built a fully responsive grocery e-commerce site (HTML, CSS, JS), optimized for both desktop and mobile.
- Structured the product catalog into organized categories with intuitive search and add-to-cart functionality, and highlighted seasonal produce to boost engagement.

Publications

- **"Web-Based AI Plant Disease Detection and Treatment Recommendation System using Deep Learning"** – Published in *International Journal of Engineering & Extended Technologies Research (IJEETR)*, ISSN: 2322-0163, Volume 8, Issue 2, March–April 2026.

Education

The Kavery Engineering College **2022 – 2026**
BE Computer Science – CGPA: 8.87/10 *Salem, Tamil Nadu*

GHSS Panankattur **2022**
HSC (12th Grade) – 64% *Omalur, Salem, Tamil Nadu*

SIMS P Kalipatti **2020**
SSLC (10th Grade) – 71% *Omalur, Salem, Tamil Nadu*

Address

Panankadu, U Maramangalam (PO), Pincode-636503, Omalur (TK), Salem (DT), Tamil Nadu.
